

JUN.-PROF. DR. JESSICA KUNERT

Alte Universitätsstraße 17, 55116 Mainz, Germany | Phone: +49 6131 39 28193 | jkunert@uni-mainz.de

RESEARCH INTERESTS

Jessica Kunert is Junior Professor for Innovation and Gender Research in Journalism at the Department of Journalism at the Johannes Gutenberg University in Mainz (Germany). Her research focuses on **the impact of (not only) digital innovations on journalism**, including **Artificial Intelligence (AI)** and automation. For example, she has investigated the perception and use of automation and AI for sports reporting in regional media houses (including public service media) and for science journalism, as well as **what makes or breaks innovation processes**. Other projects have looked at how investigative journalists use digital practices in their daily work and the special fan culture of women's football. Overall, her focus lies on how innovation finds its place in journalism and society.

Last updated: 11.02.2025

THIRD-PARTY FUNDING

1. Individual Research Grant (Deutsche Forschungsgemeinschaft (DFG)) (36 months)

Title: AI in Journalism: Exploring AI Circles in Journalism (J-AIC)

Timeframe: 2025-2028

Role: Principal Investigator and PhD Supervisor (with Juliane Lischka (University of Hamburg, Germany) and Nancy Booker (Aga Khan University, Kenya))

Topic: The project analyses the work of editorial offices with artificial intelligence (AI) from a comparative perspective between Germany and Kenya. We focus on the role of inter-organizational networks (so-called AI circles) in the introduction of AI and on the appropriation of AI by users, as well as the prerequisites for this. Using an integrative framework for media innovation, we compare factors of AI adoption and network formation at macro, meso and micro levels using a mixed-methods approach. At the macro level, we explore how technological developments, media policies and regulations influence AI adoption, comparing Kenya and Germany. At the meso level, our study examines inter-organizational AI circles and uncovers actor constellations in both countries. At the micro level, we observe individual actors (e.g. journalists) and communication patterns within AI circles over time. The overall aim of the project is to gain a comprehensive understanding of the responsible appropriation of AI in journalism, with implications for innovation theory and the research field of responsible AI.

Methods: Document analyses, ethnography, qualitative guided interviews

2. Project-Related Personal Exchange (PPP) with Australia (German Academic Exchange Service (DAAD)) (24 months)

Title: Doing fandom differently: discovering new narratives of women fans of women's football in the context of the 2023 FIFA Women's World Cup

Timeframe: 01/2022-12/2023

Role: Principal Investigator (with Christiana Schallhorn (Johannes Gutenberg University Mainz, Germany) and Kasey Symons (Swinburne University of Technology, Australia))

Topic: This project explored how women sports fans experience and practice their fandom within the culture of women's football with particular regard to the 2023 FIFA Women's World Cup (WWC). It is known that women sports fans have been marginalized in the sporting sphere, in the stands by other fans as well as in digital spaces, where this is most evident in the overt sexist and misogynist behavior they experience. Nevertheless, women are beginning to find a voice in new media such as sports blogs and social media platforms. But how do women carve out these safe spaces in the offline world? How do women's voices play out there? And how will these fan performances, connections to other fans, and creation of fan communities play out in a global sporting mega-event such as the FIFA Women's World Cup? In answering these questions, we generated demographics of women football fans and data on their spaces via an online quantitative survey, which was distributed in both Germany and Australia. Questions revolved around the themes of fan connection, navigating fan spaces (emotionally, physically and digitally), fan identity, performance of fan identity and sense of belonging.

Method: Survey
